Meeting with Aldicarb Registrant

On November 10, 2020 HED's RAB V/VII aldicarb team, along with staff from RD, BEAD, and EFED, met with representatives from AgLogic and their consultants to discuss dietary risk estimates resulting from consideration of proposed new domestic uses on oranges and grapefruit. The focus of the discussion was on the level of refinement used in current assessments. Thus, clarification was provided concerning the basis for the acute dietary point of departure, how food residue estimates were included from PDP monitoring results, and how percent crop treated estimates were determined from usage information. (W. Donovan, 703-305-7330).

Meeting with Propargite Registrants

On November 10, 2020 HED's RAB V/VII propargite team, along with staff from PRD, BEAD, and EFED, met with representatives from Extremis, Aceto Life Sciences, and MacDermid Ag Solutions as a follow up to a November 3 meeting to discuss risk mitigation proposed to address issues identified in the propargite draft human health risk assessment (DRA) for registration review. The recent discussion included confirming a nonfood use determination for an existing use, possible use cancellations, and an agreement on most mitigation proposals for worker exposure. (D. Drew, 703-305-6028).

Subject: Weekly report items

Hi folks – Could you please put together weekly report items for our meetings for aldicarb, propargite, and 2,4-DP, respectively? Thanks. Mike
